Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 8-10 and 14 are rejected under 35 U.S.C. 102(e) as being anticipated by Fuesser et al, US Patent 6,688,422. Fuesser discloses an active noise cancellation system comprising a speaker 14 for control engine sounds, controller 17 for driving the speaker, and an inherent communication portion to communicate an engine noise profile selected by the user via means 29. As disclosed in column 4 lines 1-45, the user can increase or decrease the noise reduction which reads on “communicating a selection from an individual indicating one of several available engine sounds to the controller which responsively drives the speaker to achieve the selected sound”. Claims 1 and 8 are met. As for claim 9, by manipulating the means 29 to achieve a desired noise profile reads on “programming a controller to selectively drive a

speaker of the noise cancellation system in one of a plurality of predetermined manners, each of the manners corresponding to one of the available noises.” Per claim 10, see column 4 lines 32-45 specifically. As to claim 14, inherently there is a communication network (buttons, controllers, e.g.) that facilitates communication between the individual and the controller through means 29.

Allowable Subject Matter

Claims 2-7, 11-13 and 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian T. Pendleton whose telephone number is (703) 305-9509. The examiner can normally be reached on M-F 7-4:30.
